

Thank you for clicking on our advertisement.

Cannabis (more commonly known as "marijuana") is now legal for medical and/or recreational use in 29 states and Washington DC.

Our academic research group at XXX is conducting a research study to learn as much as possible about cannabis from the public. To do this well, we need to collect accurate data from **ALL types of people** - ranging from those who have NEVER USED cannabis to those who **USE EVERY DAY**.

We believe the data that you and others contribute to this research study could be useful to policymakers when designing regulations for legal cannabis.

This survey will take **10-15 minutes to complete**. You must be 18 years or older to participate. Participation is entirely voluntary and you may quit the survey at any time. You will be asked potentially sensitive questions about your beliefs and/or use of cannabis and illegal behaviors.

All responses are **CONFIDENTIAL**. You will automatically be assigned a random ID (for example: Rx35D4fs57d9). All data will be stored on a single encrypted and password protected computer at XXX. We will **not** track IP addresses.

One final note before we start: At the end of this survey you will have the **option** to participate in a different study in which we send you 3 follow-up surveys over the next 6 months. To participate in this other study we will ask for your email address and will temporarily record your IP address only so that we can confirm you are the same person when filling out the follow-up surveys. Your email and IP address will be kept confidential.

Questions about this project may be directed to our research phone line:
XXX-XXX-XXXX

Your participation and honest answers are appreciated!!

Do you consent to participate in the survey?

☐ Yes (1)

☐ No (2)

Q4 How old are you?

▼ Under 18 (0) ... 100 (100)

Q5 Please type the text that you see picture below so that we know you are a real person.
(If you are using a smartphone you may need to turn it sideways and use a horizontal view.)
