

## **Research Assistant Recruitment Script Prior to App Download:**

“Our research group at XXX is conducting a study to learn about how to promote health and wellness in high school students. To do this, we need to collect information from students that help us better understand your experiences and health related decisions.

This questionnaire will take **10-15 minutes to complete**. You must be either a junior or senior at your high school and own a smartphone to participate. Participation is entirely voluntary and you may quit the survey at any time. All responses are completely **CONFIDENTIAL**. Risk for participation is minimal, however, any time you provide information there exists a risk of disclosure of that information. Please protect your information from others by avoiding anyone else’s access to your phone or your study information. If other people (even your friends) access your phone information, they may release it without your consent. We have worked hard to ensure your information will be protected. For example, your name or any other identifying information will not be kept with any of your answers to the survey. No one in your school will know how you answered these questions.

You will receive \$XX for completion of this baseline survey and \$XX for completion of the same survey XX months later.

We hope your participation in this project will help us find benefits for students in the future, and there are no known risks related to your participation in this research.

If you would like to participate, we will need you to download the free research App on your smartphone so that you can complete the survey. Do you have any questions about the study? Would you like to continue?”

If yes, the Research Assistant will then instruct the participants on how to download the app from their App store on their phone.

## **Once downloaded, the Within-App Consent will read as follows:**

As a reminder, this questionnaire will take **10-15 minutes to complete**. Participation is entirely voluntary and you may quit the survey at any time. All responses are completely **CONFIDENTIAL**. Your name or any other identifying information will not be kept with any of your answers to the survey. No one in your school will know how you answered these questions unless you share it with them. Please protect your study information from others by using the app when you are in a private setting.

All data will be stored safely on a secure server at XXX. We will **not** store IP addresses or store phone number information with your survey responses.

**One final note before we start:** At the end of this survey we will tell you about a second part of the research project, which is also voluntary. You can decide at that point if you would like to participate in the second part of the project as well.

If you have any questions, you can ask the person from the study in your classroom now by raising your hand.

**Your participation and honest answers are appreciated!!**

---

Q1

Do you consent to participate in the survey?

Yes (1)

No (2)

---

**At the end of the survey, participants will be provided with the following information:**

Additional questions about this project may be directed to the research assistant helping you or our research phone line:
